

# On-Line Website Design for Beginners (P-12)

This course has been designed to teach non-technical teachers how to build an educational website utilizing a web design template/program. No technical knowledge of programming is required in this self-paced step-by-step process.

The instructor will walk you through from design and setup to being live on the Internet. Learn how to effectively use and implement a wide variety of electronic learning tools and activities for your classroom such as:

- On-line digital photos
- Video
- PowerPoints
- Educational Blogs
- Web-Based Communications for collaborating on digital materials, units, stories, documentaries, and activities.

This online course is designed for the novice Internet user wishing to create a web page and improve communication to students and parents. Simple and easy to use lesson plans and templates will be provided.
